

## SAP E&C CENTRIFUGAL PUMP TEST RIG

(SAP – 55A)

### INTRODUCTION:

The Centrifugal Pump test rig system outlines the basics of the operations and principle of working.

### FEATURE:

- The self-contained unit.
- Modern industrial components are used for operating.
- Comprehensive training manual supplied.
- Optional components are available to allow fault operation and diagnosis training.

### INSTRUCTION MANUAL

Self explanatory operation manuals are provided with each system. Detailed theories as well as practical exercises are also included in the manual.

### OBJECTIVES:

1. Study of characteristics of centrifugal pump.
2. Study of characteristics of various positive displacement pumps.
