

UNIGOLD 5G

Description:

UNIGOLD 5G in granular form is specifically designed for soil application to facilitate root growth and mass. Humic and fulvic acids are instantly released as soon as it comes in contact with water. These humic acids are at least 5 times more biologically active than the humic acid derived from sources other than Leonardite.

UNIGOLD 5 G is specifically designed for Quick release and Rapid action'.

Category: Bio-stimulator and Bio-activator

Contents: **PGS** (K- salt of Humic Acid, Fulvic Acid and Minerals on Silica)

Specifications:
Appearance: Black powder granules
Active Ingredients: Min 5 %
Solubility : Instant in water

Major Benefits:

- Stimulates development of micro-flora populations in the soil. Helps in viability and seed germination. Increases white root formation and root mass.
- Assist in transferring macro and micronutrients from the soil to the plant.
- Improves soil structure like porosity, makes soil more friable or crumbly.
- Enhances water retention.
- Improve soil workability and seed bed.
- Increases membrane permeability.
- Increases plant respiration.
- Increases photosynthesis

Application rate & recommendations :

Varies from 5-10 kg per acre per application. 1-2 applications per crop.

Packing : 5kg pouch and 25 kg bulk

Shelf Life : >2 years

Suitable for all kinds of Crops :

Example : Grapes, Banana, Citrus, Pomegranates, Mango, Chikoo, Tea, Coffee, Chilies, Tomato, Vegetables, Pulses, Underground crops (Ground Nut, carrot etc) , Sunflower, Potato , Onion , Garlic , Wheat, Rice , Patchouli, Medicinal aromatic plants, Flowers, Lawns etc.

Salient Features:

- Quick release (Rapid action) of humic acid in soil helps in seed germination and root growth.
- Manufactured using best quality humic acid
- Cheaper and cost effective
- Fine, uniform and heavy granules makes distribution easy while broadcasting.
- Bio-availability 5 times greater than non Linarite based humid acid formulations.

OFFERING VALUE TO ORGANIC FARMING
