

NEELKANTH MACHINERY COMPANY

Manufacturers & Exporters of : PAPER CORRUGATED BOARD & BOX MAKING MACHINES

SHEET PASTING MACHINE

We are proud to present **Sheet Pasting Machine** as part of our product range.

This Machine is used for applying glue on the tip of the corrugated surface of board and specially designed for pasting corrugated sheets of different ply and thickness. All rolls are grinded, balanced, & hard chromed called glue pickup roll, pressure roll & doctor roll. All rolls are of M.S (Mild steel) are mounted with ball bearing for smooth running & longer life.

The machine is simply designed, strong in construction and easy to operate. It saves the time & gum as a result the final product dries fast because of the minimum application of the gum. The gum can be released at the end of the work through exit point at the corner of the gum tray. Setting of the gum can be adjusted as desired for flutes.

Features:

- The machine consists of three rolls.
- Gum tray is provided to store the gum built by H.R / C.R Steel Sheet.
- It assures fault less working during continuous operation.
- Electric Motor of 3Phase, A/C 1440 RPM / 440V ISI Marked, certified by ISO 9001-2000.

Size (in inch)	Power (H.P)
65"	1.0
72"	1.0
85"	1.0
95"	1.5
105"	1.5
