

QDL-3000 BLU-RAY

QUIC DISC 3000 AUTOLOADERS (QDL-3000, QDL-3000-BD, QDL-3000-LS)

The QDL-3000 series from Microboards Technology is the perfect solution for small CD, DVD, Blu-ray, and even LightScribe jobs. With a manageable footprint not much larger than a shoe box, the QDL-3000 fits in any office or cubicle and works unattended to make up to 60 copies per run.

Plus at an incredibly low price point, the QDL-3000 fits nearly any budget. With a 60-disc capacity and three recording drives, the QDL-3000 units give you the ability to work on more important matters with the confidence that your project will be duplicated quickly and reliably without breaking the bank. The upgraded models allow the user to duplicate discs of virtually any format.

The LightScribe unit not only records data, but etches custom labels. Simply flip the discs over after recording to complete "printing."

Operating Type: Standalone Automated

Target Drives: 3
