

UNIGOLD 20G

Description :

UNIGOLD 20 G in granular form is specifically designed for soil application to facilitate root growth and mass. Humic and fulvic acids are instantly released as soon as it comes in contact with water. These humic acids are at least 5 times more biologically active than the humic acid derived from sources other than leonardite.

UNIGOLD 20 G is specifically designed for 'Fast release and rapid action'.

Category : **PGS** (Soil Conditioner and Fertility Enhancer)

Contents : K- salt of Humic Acid, Fulvic Acid and Minerals on Silica

Specifications: Appearance : Black powder granules

Active ingredients : 18-25 %

Solubility : Instant in water

Major Benefits :

- Stimulates development of micro-flora populations in the soil. Improves seed germination and viability. Increases white root formation and root mass.
- Increases Cation Exchange Capacity (CEC).
- Assist in transferring macro and micronutrients from the soil to the plant.
- Increases availability of NPK .
- Improves soil structure like porosity, makes soil more friable or crumbly.
- Enhances water retention.
- Accelerates the recycling of organic mass.
- Improve soil workability and seed bed.
- Reduce soil erosion.
- Increases brix value.
- Increases membrane permeability.
- Increases plant respiration.
- Increases photosynthesis

Application rate & recommendations :

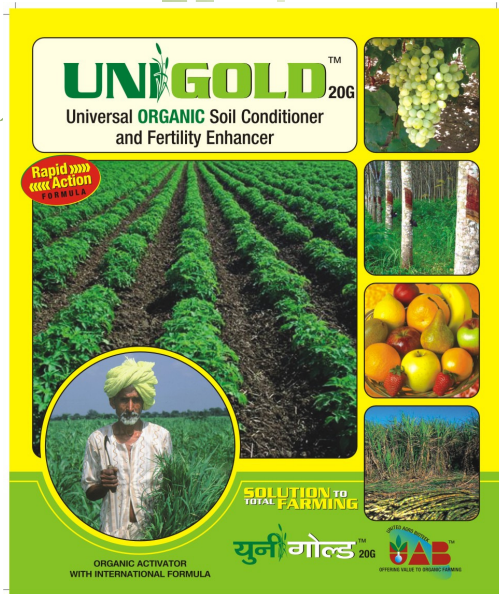

Varies from 1-2 kg per acre per application. 1-2 applications per crop.

UNIGOLD is recommended for:

1. Alkaline soils with low iron content
2. Sandy soils with low organic (humus) contents
3. Acidic soils with low humus content with simultaneous liming of the soils.
4. Saline soils
5. Lime soils

Suitable for all kinds of Crops :

Example : Grapes, Banana, Citrus, Pomegranates, Mango, Chikoo, Tea, Coffee, Chilies, Tomato, Vegetables, Pulses, Underground crops (Ground Nut, carrot etc) , Sunflower, Potato , Onion , Garlic , Wheat, Rice , Patchouli, Medicinal aromatic plants, Flowers, Lawns etc.

Unique Features :
Quick release of Humic acid in soil helps in seed Germination and root growth.
Based on best quality Leonardite Humic acid (OMRI , USA certified)
Elegant 1 kg packing
Cheaper, cost effective product
Fine , Uniform and Heavy granules makes distribution easy while broadcasting
Bioavailability 5 times greater than products based on Humic acid other than Leonardite. 1 kg Unigold 20 G is equivalent to 30-50 kg of commonly available granules in the market.
