

## Compound Table Type BJCT-275

### Features:-

Compound Table is a very useful item for every workshop. it has got two movements which are at right angles to each other.

The components are made of high grade heavy duty cast iron with brinell hardness of 180 and above and are hand scraped to conform to international standards.

Compound Table is built to withstand normal machining strains of Boring and Drilling machines etc. it can be used on Drilling Boring and Milling machines. it is also useful for inspection and setting out work. It is very ideal for machining of small components on Drilling and Milling machines.

SPECIFICATIONS		
Table Size	L x B	275 x 205 mm.
Height of Table		96 mm.
Longitudinal movement		100 mm.
Transverse movement		120 mm.
Length of base over lugs		335 mm.
Width of base		250 mm.
No. of T Slots		4
Size of T Slots		10 mm.
Centre Distance between T Slots		55 mm.
Least count of graduated collar		0.025 mm
Accuracy: Parallelity of table surface		
	with respect to base	0.02 mm.
Weight		42 Kgs.
