Blu-ray Towers

A new era in recordable media is here. Expected to revolutionise digital and high-definition storage, the Blu-ray disc provides high-capacity data recording and duplication of 25-50 GB per disc.

The CopyWriter Blu-ray series of tower duplicators employs either 4, 7, or 10 recorders. The hard drive comes standard with the Pro system and allows for archiving of up to six 25GB disc images. An intuitive, menu-driven display and a 5-button control interface provide one-touch operation for the novice user while providing advanced features for the professional.

BLU-RAY TOWER FEATURES

- Standalone 4-bay or 10-bay Blu-ray/DVD/CD duplicators
- One-touch duplication
- Hard drive standard for dynamic BD, DVD, and CD image archival
- Supports writing to BD-R/BD-RE, DVD+/-R, DVD+/-RW, DVD+/-R Dual Layer, CD-R
- Automatic format detection
- Simulation mode to ensure recording stability
- Copy + Verify
- Production quantity counter
- Automatically detects BD, DVD, and CD masters

Blu-ray Optical Libraries

The DISC BD Series is a modular design product family utilising the Blu-ray technology with 25 or 50 GB per media. The DISC BD Series capacity ranges from 1 TB to 34 TB and provides up to 14 parallel data streams of 9MB/s. WORM and rewritable media are supported. Offline data management is maintained by intelligent pack technology.

Connectivity to virtually any application is supported by the means of file systems or APIs which provide transparent access to the optical library. A wide range of storage management options is available including data migration, HSM, mirroring and read/write cache settings utilising the UDF and other file systems. Media can be managed in WORM or rewritable volume sets containing single or multiple physical media with spanning and dynamic expansion options.

DISC OPTICAL LIBRARIES

- Modular design for individual configurations
- Pack technology for offline management
- Blu-ray technology
- Redundant power supply option (standard for DISC 7000 models)
- Multiple LVD busses
- Built-in diagnostics
- Rackmount option
- Options for direct attach, NAS, Fibre Channel, i-SCSI interface

- Direct-attach OS support for MS Windows, Mac, Linux and Unix, and Novell NetWare
- Network attach support through NAS appliance or MS Windows Storage Server 2003 services
- Tape Emulation appliance

DVD units also available.
