

NEELKANTH MACHINERY COMPANY

Manufacturers & Exporters of : PAPER CORRUGATED BOARD & BOX MAKING MACHINES

ECCENTRIC SLOTTER

We are proud to present **Eccentric Slotter** as part of our product range.

We offer heavy duty eccentric slotter machine, which is used to punch out slots and stitching edge in the corrugated sheets. This machine is manually operated and capable of slotting a number of sheets at a time. The distance between two slots, slot depth and the side gauges as well as the gap between lower knives are adjustable. We have designed and engineered advanced range of eccentric Slotter Machines that are used for slotting and corner cutting of the corrugated boards simultaneously. The distance between slotting and corner cutting heads are adjustable with gear rack mechanism provided with the machine. Two side gauges are provided for accurate feeding. The upper dies move in an arc so that the board is slotted in a shearing manner. Minimum distance between two dies is 7" corner width is 3.5"

Features:

- Heavy duty
- Colossal strength
- Resilient
- Incomparable performance
- Diverse measurement
- Superior quality
- On time delivery
- Reasonably priced
- The machine is equipped with 3 slotting heads & 1 corner head (L shaped cutting)
- The heads can be adjusted accurately to the required size

Size (in inch)	Slot Depth Max. (in inch)	Power (H.P)
65"	18	3.0
75"	18	3.0
85"	18	5.0
95"	18	5.0
105"	18	7.5
