

Silvol Mp-2 & 3 Grease Automotive Greases

SILVOL MP-2 & 3 GREASE is a premium quality lithium based multipurpose greases meeting industrial plant and automotive requirements including ball and roller bearing and electric motors bearing lubrication. These lithium based greases have been formulated with specially selected raw materials for optimum lubrication under normal as well as adverse mechanical conditions.

Product features :

- Excellent protection against rust, corrosion and water wash out
- Excellent shear stability
- High drop point
- Good thermal and structural stability
- High degree of resistance to oxidation
- Good protection at high temperatures

Consumer benefits:

- Strong protection against water wash-out
- Extremely effective rust & corrosion protection to metal parts
- Adequate wear protection of parts

Applications:

- Recommended for chassis fittings, wheel bearings, grease cups, grease lubricated universal joints and other lubrication points in passenger cars, buses, trucks, tractors, mobile construction as well as earth moving machinery.
- Heavy duty ball and roller bearings of steel rolling mill operating under heavy loads, shock loads etc.
- Electric motor bearing, fan bearing, pump bearing, steering joints and other plain and anti-friction applications.
- All industrial applications where lithium based grease is required.

Performance Level: IS 7623: 1993, NLGI

Available in :

MP-2:180 kg, 18 kg, 10 kg, 5 kg, 3 kg, 2 kg, 1 kg, 500 gms, 200gms(P), 100gms(P).

SPECIFICATIONS

Sr.	Properties	Multi Purpose Grease	
		MP-2	MP-3
1	Consistency of worked grease at 25±0.5 °C	265-295	220-250
2	Drop point, . °C Min.	184	184
3	Soap Type Structure	Lithium Smooth & Buttery	

* The specifications are subject to variations / development / customization
