

MULTI-WRITER BLU-RAY

MICROBOARDS
Technology

MULTI-WRITER BLU-RAY • DVD • CD

Write up to five Blu-ray Discs at a time at blazing speeds with the all-new Microboards Multi-Writer Blu-ray Tower! Unlike the traditional line of CopyWriter towers that allow the copying of one master disc to a number of blank discs, the Multi-Writer is a PC-connect system that records data directly from the PC to all five combo drives. Utilizing an eSATA cable, the Multi-Writer records Blu-ray Discs, DVDs, and CDs of almost any format at top speeds. The Multi-Writer includes Zulu2 Disc Mastering software, making it easy for you to select files to record, save and retrieve jobs, and perform other mastering tasks. Simply connect to your PC, install the software, and begin recording Blu-ray Discs, DVDs, or CDs up to five at a time. The Multi-Writer is compatible with Windows XP and Vista (32-bit only systems).

Recorders: 5

Supported Writing Formats: BD-R, BD-RE, DVD-R, DVD-RW, DVD+R, DVD+RW, DVD+R DL, DVD-R DL, CD-R, CD-RW
