Eureka Forbes the marketeers of Aquaguard now bring you the new Multi-functional Water Purifier - the only product of its kind that assures you of Safe Drinking Water even when there is a power failure and its Bubble-top facility guarantees safe drinking water supply even when there is no running water.

Aquaguard Multi-functional Water Purifier that offers you:

6-stage online water purification:
The Aquaguard Multi-functional Water Purifier has a unique feature wherein it can be connected directly to the tap and water passes through a 6-stage purification process ensuring you of absolutely safe drinking water:

The 6-stage purification process comprises:

- **UF Membrane Filter**
  This process removes residual impurities and disease-causing bacteria and has a fine porosity of 0.01 micron. Thus delivers safe & crystal clear drinking water.

- **Post Silver Impregnated Carbon Filter**
  This process polishes the water and improves the taste.

- **Ultraviolet Disinfection**
  The ultraviolet technology is internationally proven as a method of eliminating all waterborne disease-causing bacteria and viruses. So you can be sure of absolutely safe drinking water.

- **Round-the-clock safe drinking water**
  Even in the case of power failure, you can be assured of safe drinking water through our UF Technology that does not depend on power.

- **Buble-top attachment option**
  This feature is a big help during those times when office water supply has stopped. Just add the ISI certified bubble-top mineral water bottle available in the market and you can have not just safe and purified drinking water, but also water that’s hot/cold.

  - **Cold Water**
    This outlet provides you with a refreshing glass of chilled water to cool you when ambient temperatures are high. This water can also be used to make soft drinks.

  - **Hot Water**
    This outlet provides you with hot water that is ideal for making a quick cup of tea, coffee or soup.

  - **Normal water**
    When the hot water option is not in use (heater OFF mode), you can get room temperature water.

- **Saves Money**
  The maintenance free refrigeration system and low power consumption ensures that you save money on refrigeration system maintenance costs and power.

- **Convenient water spillage tray**
  The water that spills while dispensing will get collected and to be drained out.

- **Child lock facility and independent faucets**
  Press the knob (blue) to dispense cold water. Slide up the child lock and press the knob (red) to dispense hot water.

- **In-built storage tank**
  A 3-litre capacity stainless steel in-built storage tank ensures the availability of 3-litres of purified water.

- **Efficient after sales service at your doorstep.**
  Aquaguard is marketed & serviced by Eureka Forbes, so you can be assured of prompt and efficient after sales service, backed by an expert service team.
