

Electronic Article Surveillance (EAS) :

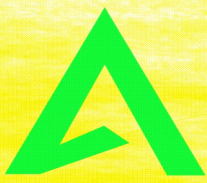

Electronic Article Surveillance (EAS) is a kind of electronic anti shoplifting system that can decrease shoplifting when retailing enterprise implement open-shelf sale, so increase sales and profit. EAS system consists of electronic sensors, deactivator system and label or tag. Electronic sensor that are located at store exits, a transmitter sends a unique signal at certain frequencies to a receiver, which creates a "surveillance area" at a store exit, when a product with an active label or hard tag is moved past a sensor, the sensor sets off an alarm.

Retail Theft Prevention Systems (RFID Tags):

We offer electronic article surveillance (EAS) systems, which are designed to assist the retailers for enhancing their sales and protecting their profits by reducing shoplifting and internal theft. Our EAS systems are engineered and manufactured for superb detection & deactivation performance, durability, ease-of-use, and aesthetics to match any decor. These systems are based on innovative acousto-magnetic technology and retailers experience virtually no false alarms.

EAS Sensor:

Product Name	Model	Description	Picture
PDS3210C Sensor	PDS3210C	Adopt DSP chip signal processing way, integrated with multi anti noise technology and multi software analysis way. This model is one kind of narrow detection distance sensor, the detection distance range is 70cm-110cm.	
PDS8810 TianXiang type Sensor	8810	Adopt DSP chip signal processing way, integrated with multi anti noise technology and multi software analysis way. This model is one kind of wide detection distance sensor, the detection range is 1.1m for soft label, 220cm for big size hard tag.	
PDS3210B Sensor	PDS3210B/G	Adopt DSP chip signal processing way, integrated with multi anti noise technology and multi software analysis way. This model is one kind of wide detection distance sensor, the Max detection distance is 140cm for soft label, 200cm for big size hard tag.	
PDS8800 TianAn type Sensor	PDS8800	Adopt DSP chip signal processing way, integrated with multi anti noise technology and multi software analysis way. This model has elegant antenna design. The Max detection distance for soft label is 120cm, the Max detection distance for hard tag is 200cm.	
PDS3210D Sensor	PDS3210D	Adopt DSP chip signal processing way, integrated with multi anti noise technology and multi software analysis way. This model is one kind of wide detection distance sensor, the Max detection distance is 120cm for soft label, 180m for big size hard tag.	
PDS3108C1 Sensor	PDS3108C2	Adopt DSP chip signal processing way, adjustment don't need oscilloscope , This model is one kind of narrow detection distance sensor, the detection distance is less than 120c m, fit for medium or small size supermarket and convenient store	
PDS3108C2 Sensor	PDS3108C1	PDS3108C2 is one kind of economic sensor sepcial designed for medium or small size supermarket and convenient store, it usually used in supermarket that POS counter less than 5pcs or used in the main entrance. The detection range is 80cm-120cm.	

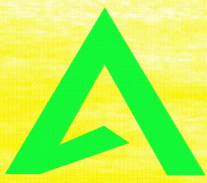

Deactivator, Deactivator Pad :

Product Name	Model	Description	Picture
PD960 deactivator	PD960	PD960 deactivator have alarm indicative function, when the hard tags passing the pad, or when some soft labels did not be deactivated, the deactivator will alarm to remind the store staff to release the hard tags or deactivate the soft label once a more time. So it can avoid alarming when tags did not be released	
PD950 Deactivator	PD950	PD950 deactivator can deactivate label in contact less and quick way, and it can work with the laser scanner that has inter-lock function. Sweeping bandwidth is 7.4~9.0MHz, deactivation speed is 60 pcs/min, the effective deactivation height is 15cm.	
PD9004B pad	PD9004B	PD9004B pad is made of ABS plastic, and it should work with deactivator together, when 8.2MHZ soft label passing, the soft label can be deactivated.	
PD9006 pad	PD9006	PD9006 pad is made of ABS plastic and it special work with deactivator PD960 which have the indicative function, when 8.2MHZ soft label passing, and if there have soft label did not be deactivated, then the light of the pad will getting red to indicate.	

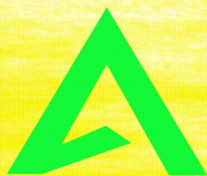

Detacher :

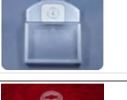

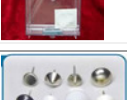

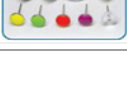

Product Name	Model	Description	Picture
PD805A Detacher	PD805A	PD805A Detacher is a kind of standard detacher that has metal shell; it only can open those standard hard tags.	
PD807A Detacher	PD807A	PD807A Detacher is a kind of strong magnetic detacher that has metal shell; it can open both of standard hard tags and strong magnetic hard tags.	
PD807B Detacher	PD807B	PD807B Detacher is a kind of strong magnetic detacher that has metal shell; it can open both of standard hard tags and strong magnetic hard tags.	
PD805B Detacher	PD805B	PD805B Detacher is a kind of standard detacher that has metal shell; it only can open those standard hard tags.	

Hard tag :

Product Name	Model	Description	Picture
PT330 Bottle safer	PT330	PT330 bottle safer have good performance, high sensitivity, it is suitable be used for the protection of white and red wine. The length of bottel safer is 18cm.	
PT331 Milk safer	PT331	PT331 milk safer have good performance, high sensitivity, and wide detection range, it is suitable be used for the protection of milk bottle or columned bottle. The length is 50cm.	
PT310 Hard tag	PT310	PT310 small UFO has good performance and high sensitivity, it is suitable be used for the protection of clothes and shoes. The size is ϕ 48mm, the color can be custom-made.	
PT314 hard tag	PT314	PT314 mini square tag have good performance and high sensitivity, it is suitable be used for the protection of clothes and shoes. The size is 49*43mm , the color can be custom-made.	
PT313 hard tag	PT313	PT313 samll cape have good performance and high sensitivity, it is suitable be used for the protection of clothes and shoes. The size is ϕ 46mm, the color can be custom-made.	
Cigarette safer	PT504	PT504 cigarette safer has high sensitivity, it is suitable be used for the protection of many kinds of cigarettes. The size is 357*110*60mm	
PT312 hard tag	PT312	PT312 is kind of big size high Q tag, high sensitivity, it is suitable be used for the protection of many kinds of clothes and shoes. The size is ϕ 62mm, it is a kind of wide detection distance tag.	
PT315 hard tag	PT315	PT315 mini pencil tag is suitable be used for the protection of many kinds of clothes and shoes. The size is 55*18*14mm.	
PT316 hard tag	PT316	PT316 have good performance and high sensitivity, elegant design, it is suitable be used for the protection of many kinds of clothes and shoes. The size is 42mm.	
PT317 hard tag	PT317	PT317 mini straw-hat tag is suitable be used for the protection of many kinds of clothes and shoes. The size is 42mm.	
PT318 hard tag	PT318	PT318 big size hard rag has high sensitivity and wide detection distance, it is suitable be used for the protection of many kinds of clothes and shoes. The size is 65mm.	
PT319 optical tag	PT319	PT319 optical has elegant design, softness color, it is suitable be used for the protection of many kinds of sun glasses and short sight glasses.	
PT332 bottle belt	PT332	PT332 bottle belt has high sensitivity, it is suitable be used for the protection of many kinds of drink bottle or columned bottle. The length is 156*14*2mm.	
CD safer	PT505	PT505 is specil safer box for one_disc CD. It has good performance and high sensitivity. With mechanical lock of steel ball,made by industrial ABS plastic.	

Cassette Safer	PT506	PT506 is specil safer for cassette . It has good performance and high sensitivity. With mechanical lock of steel ball,made by industrial ABS plastic.	
Double-disc CD safer	PT507	T507 is specil safer for double-disc CD. It has good performance and high sensitivity. With mechanical lock of steel ball,made by industrial ABS plastic.	
DVD safer	PT508B	PT508B is specil safer for DVD. It has good performance and high sensitivity. With mechanical lock of steel ball,made by industrial ABS plastic.	
Battery safer	PT509	PT509 is specil safer for the battery . It has good performance and high sensitivity. With mechanical lock of steel ball,made by industrial ABS plastic.	
Ink Cartridge Safer	PT513	PT513 is specil safer for ink cartridge safer. It has good performance and high sensitivity. With mechanical lock of steel ball,made by industrial ABS plastic.	
Multifunction safer	PT514	PT514 is multifunction safer . It has good performance and high sensitivity. With mechanical lock of steel ball,made by industrial ABS plastic	
Pin	PT215-240	Work with all kinds of hard tag,with 3-4 geer teeth, tighten it with hard tag,suitable for thick clothes.	

Soft Label :

Product Name	Model	Description	Picture
Soft Label	PT450	PT450 has good performance. It is suitable protecting non-metal products.Dimension is 4*4cm. It is imported from Belgium and used in short-range detection.	
Soft Label	PT470	PT470 has good performance. It is suitable protecting non-metal products.Dimension is 3*3cm. It is imported from Belgium and used in short-range detection.	
Soft Label	PT410	PT410 has good performance. It is suitable protecting non-metal products.Dimension is 3*3cm. It is imported from Belgium and used in short-range detection.	
Soft Label	PT480	PT480 has good performance, It is suitable protecting non-metal products. It can work in hand-grasp way .Dimension is 4*4cm. It is imported in Japan and used in short-range detection	
Soft Label	PT416	PT416 has good performance and cheap price. It is suitable protecting non-metal products. It's sensor matic less than PT410.Dimension is 4*4cm. It is made in China and used in short-range detection.	

Others :

Product Name	Model	Description	Picture
Handhold Detector	PT1000	It adopts SMT technology, the detection distance is 10cm, , respect customers and avoid searching directly.	
Synchronizied Controllor	PFS10002	Synchronized controller, used in big project with more than 12 TX.
